100% treatment

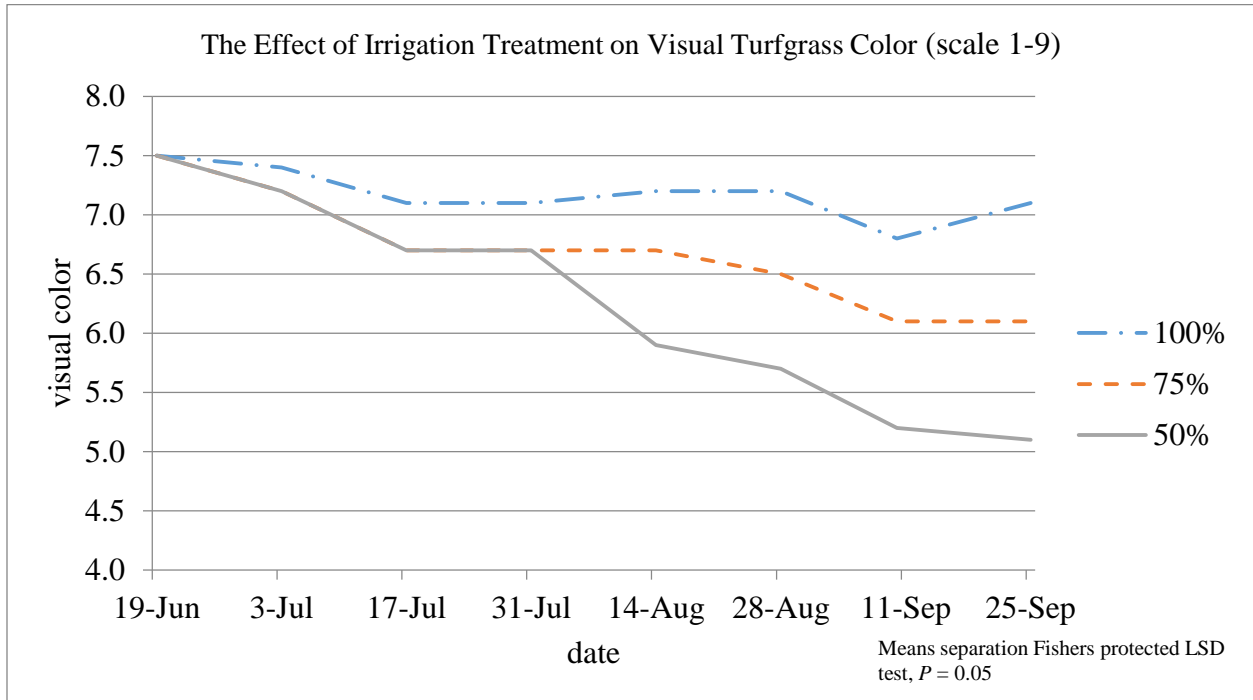

75% treatment

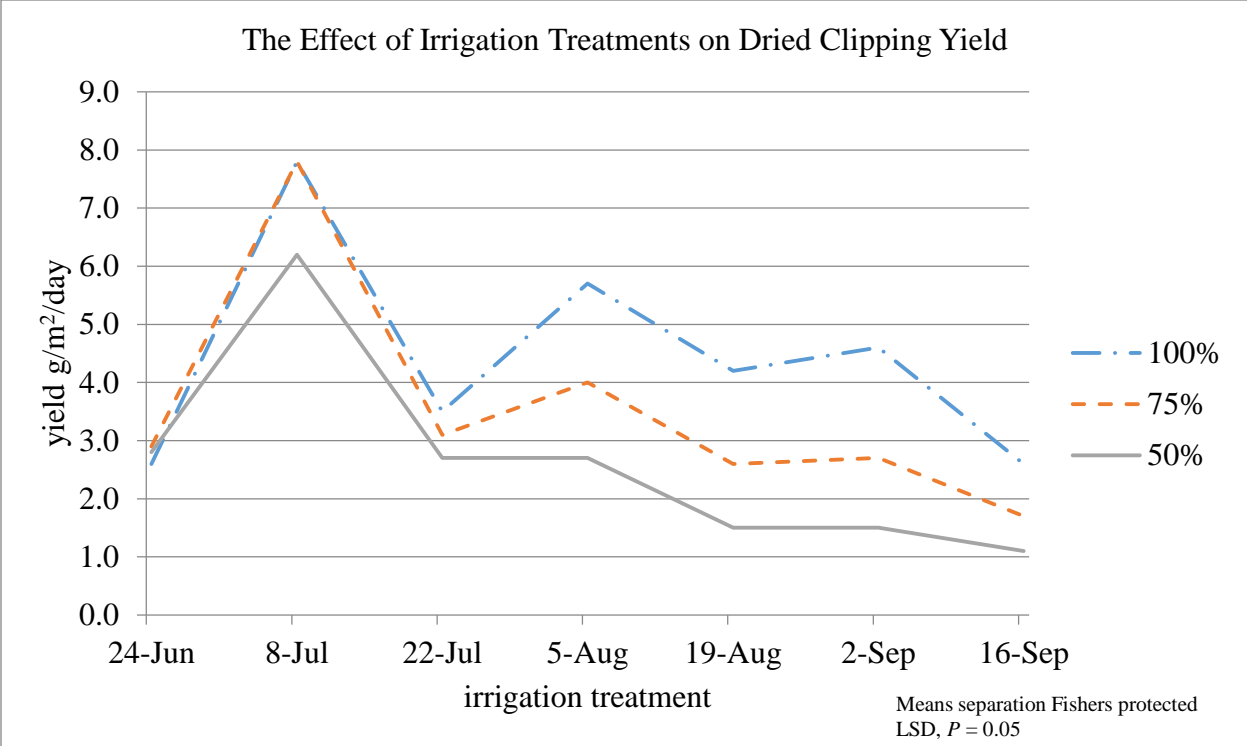

50% treatment

Subjective visual ratings were taken biweekly which included color and quality ratings. Visual quality ratings are species specific and are on a 1 to 9 scale; 1 = brown, dead turfgrass; 9 = best quality and color; 5 = minimally acceptable; and 6 = acceptable quality and color. Data shows 50% treatment staying above minimally acceptable turf quality and color, with 75% treatment staying above acceptable turf quality and color for the duration of the study.

Analysis of Gravimetric Water Content (0-15cm Depth)
